New River Valley Lands Another Plastics Industry

Blue Bird Resins has decided to locate their second U.S. manufacturing/recycling operation in Virginia's New River Valley in the Town of Pulaski in Pulaski County, VA. They are an industrial recycling operation dedicated to converting waste to valuable "scrap commodity". Based in Winchester, VA, Blue Bird Resins will be expanding to the Pulaski Furniture Complex in Pulaski, VA to better serve customers along the I-81 Corridor and further south. Initially they will be utilizing 7,000 sq. ft. of space with expansion capabilities to grow to over 40,000 sq. ft.

This announcement follows several other plastic related industries that have recently selected locations in Virginia's New River Valley including Planet Care, Inc (a rotational molding company from Florida), Phoenix Packaging (a thermoforming company from Colombia), and Dove Vinyl Windows (a vinyl window manufacturer from Pennsylvania). Mr. Ken Anderson, Chairman of the New River Valley Economic Development Alliance was quoted as saying, "It is great to see the continued growth of a target industry such as "plastics" here in the New River Valley."

Mr. Dan Oberlander of Blue Bird Resins stated, "We are extremely excited about the business opportunities we have discovered in/around the New River Valley – not only does there seem to be a great business climate but the people helping to grow the area have been fabulous." Dr. John White with the Town of Pulaski went on to say, "We certainly welcome Blue Bird Resins to the community and appreciate their commitment to our community and the jobs that they will be creating in the coming years – every job matters."
